# App Concept & Scope

Brilliant Budget is an app idea that is intended to provide users with an easy and efficient way to set monthly budgets. The app will include features where a user can plan the prices of a customized category list, add and view their sources of income page, be able to see how much they have spent to date, and also be able to see what is left. There is also an insights page so the user can view and analyze their financial decisions.

When designing the application, I referred to several budgeting apps to get an idea of how these apps tend to look.

A few apps that I looked at were: Goodbudget & NerdWallet

The User Interface was created with the thought of a easy to understand yet aesthetically pleasing design. The apps I explored seemed not so user friendly and I was often confused while navigating through them, so I wanted to avoid this. I chose a range of green colors as my main colors to resemble the thought of money/finance. I included some brighter colors in areas where important info needed to stand out so that the user wouldn't miss it.

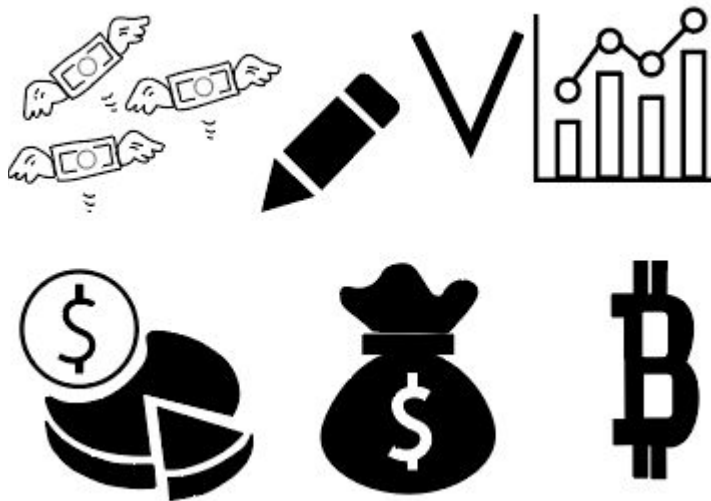

# Graphic Elements & Assets

## Typography:

### Marker Felt

Aa Bb Cc Dd Ee Ff Gg  
Hh Ii Jj Kk Ll Mm Nn  
Oo Pp Qq Rr Ss Tt Uu  
Vv Ww Xx Yy Zz

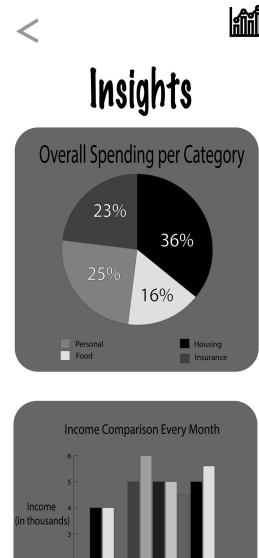

## Icons:

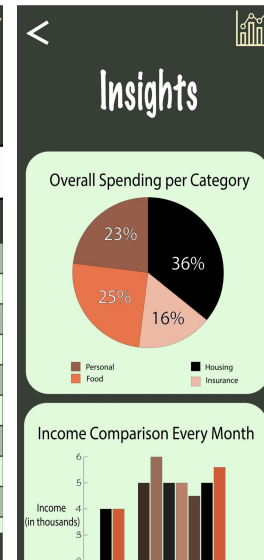

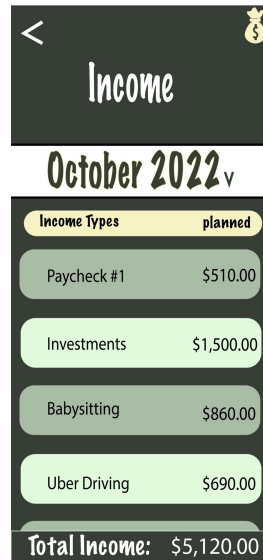

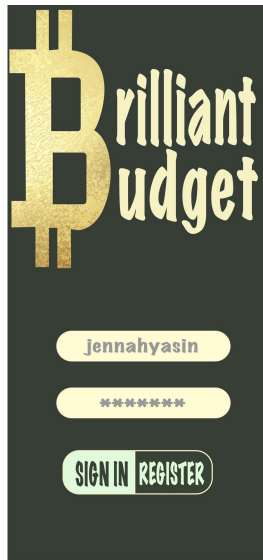

## Color Palette

# Low-fi Wireframes

# Hi-fi Iteration 1:

# Hi-Fi Iteration 2 (Chosen Design)

## Changes:

Main front changed from Market Felt to Sinhala MN, layout changes, and minor outlining changes.
